Summary

Motivated Computer Science Engineering undergraduate skilled in full-stack development, problem-solving, and web technologies. Passionate about applying computer science skills to build impactful, real-world products. Eager to contribute to a fast-paced engineering team and grow through hands-on experience.

Education

Vidyavardhaka College of Engineering, Mysuru

B.E. in Computer Science and Engineering — CGPA: 8.82

JSS PU College, Mysuru

Pre-University Education — Percentage: 83.5%

St. John's School, Gundlupete

Secondary Education — Percentage: 85.12%

Skills

- **Languages:** C, C++, HTML, CSS, JavaScript
- **Core (Interview Focus):** Data Structures & Algorithms, Object-Oriented Programming, RDBMS (MySQL), REST API Design, Computer Networks, Operating Systems
- **Frameworks & Libraries:** React, Node.js
- **Databases:** MySQL, PostgreSQL (Supabase), MongoDB
- **Cloud & DevOps:** AWS & GCP Basics, Docker, Kubernetes, Vercel
- **Testing:** Jest (Unit & Integration Testing), API Testing (Postman)
- **Tools & Platforms:** GitHub, Git, Jira, Slack, Postman
- **Soft Skills:** Leadership, Time Management, Analytical Thinking, Teamwork

Projects

SwarCure — AI Music Wellness App (Team of 3)

Tech Stack: React, JavaScript, REST APIs, Supabase (PostgreSQL)

- Engineered an AI-driven mental health analysis system utilizing the PHQ-9 framework to evaluate user wellbeing and provide actionable, instant insights
- Delivered personalized, culturally relevant therapeutic recommendations enriched with Indian classical music to actively help alleviate user stress and anxiety
- Architected a real-time, context-aware backend system to process user inputs seamlessly, ensuring secure, low-latency interactions and a smooth user experience
- Manually tested core flows including PHQ-9 scoring, recommendation generation, and real-time backend responses to validate accuracy and reliability before final submission

VVCE Connect — Campus & Hostel Networking Platform (Individual Project)

Tech Stack: React, Node.js, TypeScript, Supabase (PostgreSQL), REST APIs

- Created a multi-stage approval workflow for exam duty swaps routing between Faculty, HODs
- Secured sensitive scheduling and faculty data using database-level row security and role-based access control
- Developed a dynamic, filterable room allotment interface with a clean, responsive layout
- Integrated the Resend API to automate real-time email alerts for duty assignments and swap approvals
- Wrote unit and integration tests with Jest, improving test coverage across core API endpoints and approval workflows
- Deployed and hosted the application for live access and testing

Achievements

- Web Development Competition (DEVCOM, VVCE) – 1st Place
- IIC Idea Generation Competition – 2nd Place
- IIC Mini Project – 3rd Place

Extracurricular Activities

- Coordinator – Hackshetra Hackathon
- Active participant in NSS
